

## INTRODUCTION

### EMAIL BOT -UI PATH

- An email bot is an automated marketing tool that can respond quickly to incoming email leads. This BOT can automate the old hat tasks. This bot can read data from excel file, extract email id and send personalized mails to recipient and lot more.
- One can send personalised emails to the recipients and bot can take input from excel file.

### USER INTERFACE

Welcome to users interface. In this section, we will cover the basic and advanced operations of the bot available to the users.

Bot is compatible with all the major windows operating systems including:

- Windows 7
- Windows 8.1
- Windows 10
- (all variants 32bit and 64bit)

- ***\*Your computer should have .net framework in order to install/run Bot (generally it comes with windows else you have to download it from Microsoft).***

***\*It is always recommended to keep your windows updated to the latest build. Once you have completed the above pre-requisites you can below screenshots.***

***\*Open google and search of ui path click on the link just as shown in screenshot below.↓***

The screenshot shows a Google search interface with the query 'ui path' entered in the search bar. The search results show 'About 32,00,00,000 results (0.51 seconds)'. The top result is 'www.uipath.com' with the title 'UiPath: Robotic Process Automation' circled in red. Below the title is a brief description: 'UiPath is a leading Robotic Process Automation vendor providing a complete software platform to help organizations efficiently automate business processes.' To the right of the search results is a knowledge panel for UiPath, which includes the company logo, a brief description, and various details about the company.

**\*After registration a page like the below will open. Click on Download Studio/StudioX**

The screenshot shows the UiPath Platform dashboard. On the left is a sidebar with navigation links: Home, Admin, AI Fabric, and Help. The main content area is titled 'Good evening, Puneet' and 'Orchestrator Services'. It shows a service named 'JECRCDefault' last updated 42 days ago. Below this is a 'License Usage' section with tabs for Robots, Studios, and Other Services. The Robots tab is active, showing a bar chart with four categories: Attended (2 of 2), Unattended - Runtime (1 of 1), Testing - Runtime (1 of 1), and Non-production - Runtime (0 of 0). On the right side, there is a 'Manage' section with two cards. The first card is 'Design your workflows in UiPath Studio' with a 'Download Studio/StudioX' button circled in red. The second card is 'Connect your first Robot' with a 'Watch Video' button.

**\*It will take some time as it is downloading dependencies (this is a one time process keep the internet connected.)**

**\*After this is Bot file is open.**

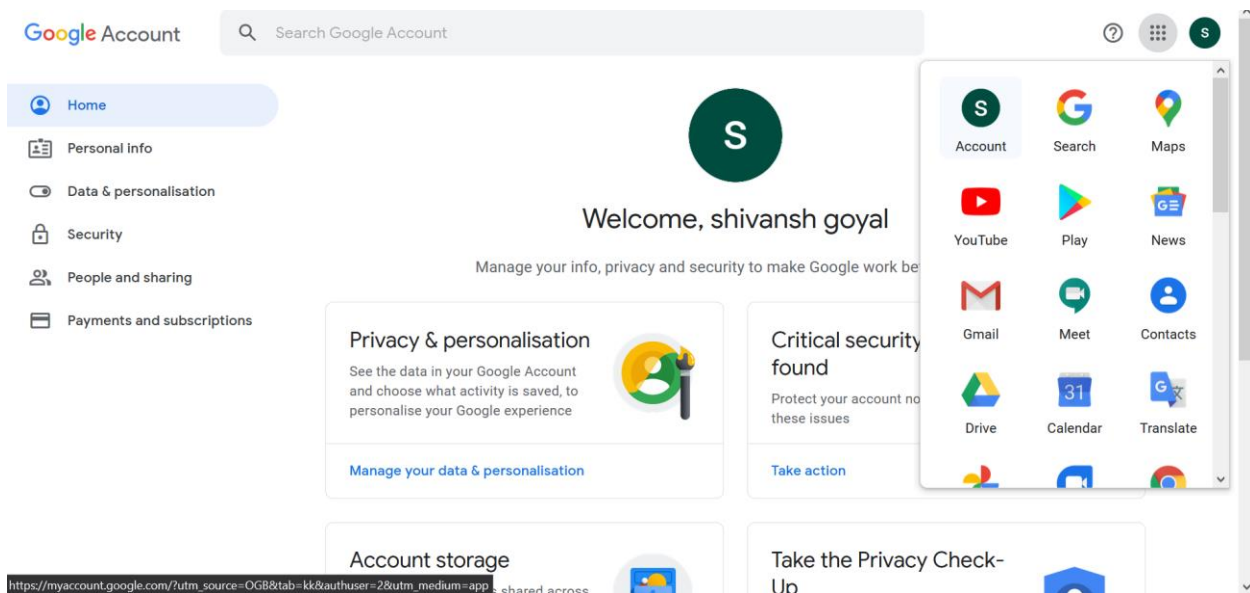

**\*Now Scroll down and click for Send SMTP Mail Message you can change the below columns According to you,(the details you are filling are only the details from which name Mail Goes,**

**\*In From enter you Email, In Name Enter the name from which you want to send Mail)**

**\*[MUST]Before running the bot first enable the “Less Secure App Access”.**

**To do so follow the below steps**

Google Account

Search Google Account

Home

Personal info

Data & personalisation

**Security**

People and sharing

Payments and subscriptions

Manage devices

Manage third-party access

### Less secure app access

To protect your account, apps and devices that use less secure sign-in technology are blocked. To keep your account secure, Google will automatically turn this setting OFF if it's not being used. [Find out more](#)

Off

[Turn on access \(not recommended\)](#)

### Signing in to other sites

 Signing in with Google

You use your Google Account to sign in to 9 sites and apps

You don't have passwords saved in your Google

<https://myaccount.google.com/u/2/lesssecureapps>

## ← Less secure app access

Some apps and devices use less secure sign-in technology, which makes your account vulnerable. You can turn off access for these apps, which we recommend, or turn it on if you want to use them despite the risks. Google will automatically turn this setting OFF if it's not being used. [Learn more](#)

Allow less secure apps: ON

### Less secure app access

Your account is vulnerable because you allow apps and devices that use less secure sign-in technology to access your account. To keep your account secure, Google will automatically turn this setting OFF if it's not being used. [Find out more](#)
